Executive Summary & Analysis

This report presents the quarterly sales performance for the fiscal year 2024-25 across five product categories: Soap, Hand Wash, Body Wash, Shampoo, and Face Wash. The year was marked by significant volatility driven by external supply-chain factors and seasonal demand patterns.

Reason 1 - Festive Season Demand (Q3-Q4): The festive season spanning Diwali in Q3 and the year-end celebrations in Q4 drove a sharp increase in demand across all categories. Soap sales rose from 12,000 boxes in Q1 to 18,500 boxes in Q4, a 54% increase. Body Wash similarly jumped from 10,000 to 15,200 boxes. The festive period is traditionally the strongest sales window for personal care products in the Indian wholesale market, as retailers stock up in anticipation of higher consumer spending on grooming and gifting.

Reason 2 - Supplier Delay in Q2 (Distributor B): Q2 saw a noticeable dip across all categories. Distributor B experienced logistics and customs delays that reduced supply by approximately 20-25% for two key product lines. Soap fell from 12,000 boxes in Q1 to 9,500 in Q2, and Shampoo dropped from 11,000 to 9,000. The supply gap was resolved by Q3 as alternative sourcing arrangements were put in place.

Reason 3 - Price Increase in Q4 (8-12% on Bar Soaps): A price revision was implemented in Q4, increasing bar soap prices by 8-12% due to rising raw material costs. Despite the price increase, volume continued to grow due to festive demand, resulting in higher revenue. The price change contributed to an estimated 15% revenue uplift on soap alone. Face Wash, which had a smaller price adjustment of 5%, saw the most modest Q4 increase, going from 6,000 boxes in Q1 to 8,500 in Q4.

Quarterly Sales by Category (Boxes)

Category	Q1	Q2	Q3	Q4	Total
Soap	12,000	9,500	14,000	18,500	54,000
Hand Wash	8,000	7,200	9,500	11,500	36,200
Body Wash	10,000	8,500	12,000	15,200	45,700
Shampoo	11,000	9,000	13,500	16,000	49,500
Face Wash	6,000	5,500	7,000	8,500	27,000
Total	**47,000**	**39,700**	**56,000**	**69,700**	**212,400**

Table 1: Quarterly sales volumes (in boxes) for each product category. The total column shows annual volume per category.

Quarterly Sales Trend

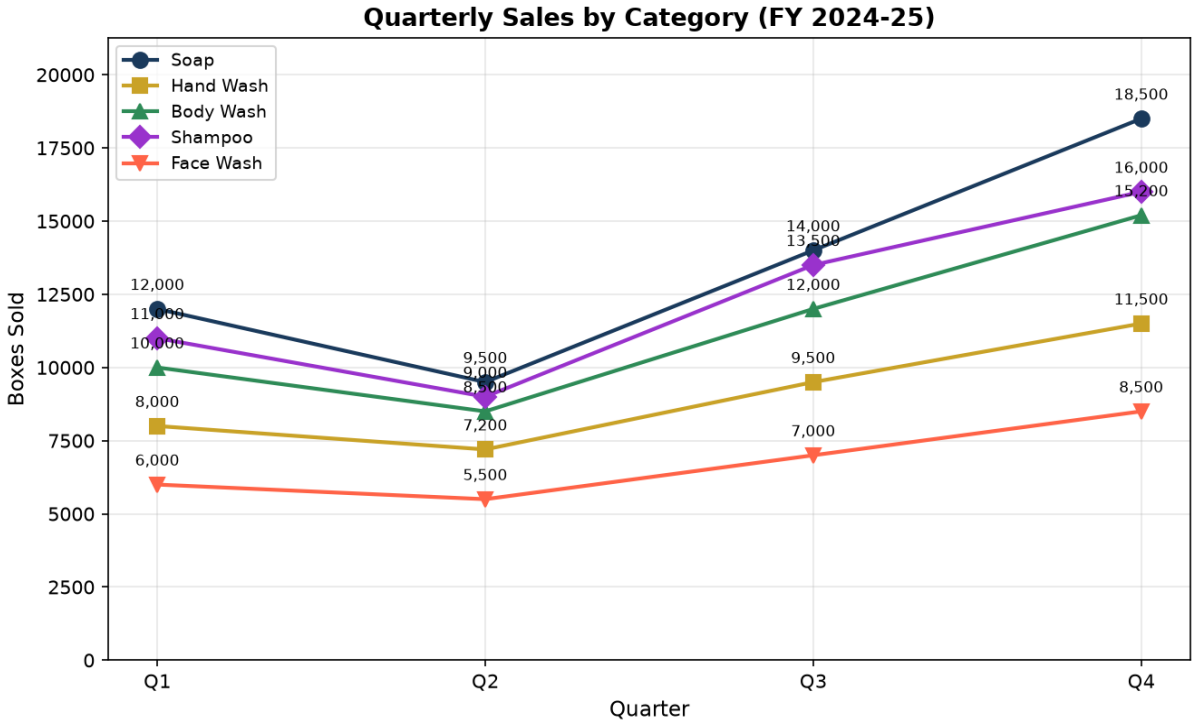

Figure 1: Line chart of quarterly sales by category. The data shown matches Table 1 exactly. All five categories follow the same pattern: a Q2 dip due to the Distributor B supply delay, followed by strong recovery in Q3 and Q4 driven by festive season demand and the Q4 price adjustment.
